Historical language advisory

Certain parts of the Library and Archives Canada (LAC) collection contain historical language and content that some may consider offensive, for example, language used to refer to racial, ethnic and cultural groups. Items in the collection, their content and their descriptions reflect the time period when they were created and the view of their creator. The items retain their original descriptions to ensure that attitudes and viewpoints are not erased from the historical record. LAC provides additional descriptive information to give background on the records. This is an ongoing process. For more information, please visit LAC's Historical language advisory page.

Mise en garde – terminologie historique

Certaines parties de la collection de Bibliothèque et Archives Canada (BAC) renferment de la terminologie et des contenus à caractère historique que certains pourraient considérer comme offensants, notamment au chapitre du langage utilisé pour désigner des groupes raciaux, ethniques et culturels. Les éléments qui composent la collection, leurs contenus et leurs descriptions sont le reflet des époques au cours desquelles ils ont été créés et des points de vue de leurs créateurs. Les descriptions d'origine sont conservées afin que ces attitudes et perspectives ne soient pas supprimées des sources historiques. BAC fournit toutefois des renseignements descriptifs supplémentaires dans le but de donner davantage de contexte aux documents, le tout dans le cadre d'un processus évolutif. Pour en savoir plus, visitez la page Mise en garde – terminologie historique de BAC.

REGISTERED

Mr. Phillip Phalen
Superintendent of Training
Department of Mines & Resources
Indian Affairs Branch
OTTAWA, Ontario.

Dear Sir:

I have called several times during the past year at the Indian School at Shubenacadie because I have been interested in the progress Sister Paul has made in teaching pottery to the students. Father Mackey and I have discussed the economic possibilities of this type of work and I think he has now agreed that much could be done with the Indian children if he had the facilities. Present drains on finances are severe and I can easily understand restricted budgets. However, with comparatively small expenditures articles in clay sold on the main highway like the one running through Shubenacadie would soon produce results. Furthermore this is the only place in the province where we could get characteristic Indian designs from the Indians themselves and Sister Paul is trying to develop these.

Father Mackey will discuss the possibility of a kiln with Mr. Shaw of L. E. Shaw Company, and I think co-operation from that source is assured. The Provincial Department of Industry and Public Information through its minister is interested in developing this work throughout the province. Publicity and perhaps some subsidy can be secured for impoverished localities, but other than for the publicity it may not be possible to secure aid for the Indian School.

I am writing you this letter so you will be informed about the possibilities in Shubenacadie and the attempt we would like to see made to aid the Indian children in acquiring a skill based on a natural resource plentiful in the province. My impression is that skill in pottery making would be a valuable addition with economic possibilities to the commercially known one which the Indians possess, the making of baskets. Our hope is that in the near future we shall be able to command some of the local market for clay products which is at the present time being satisfied from outside our provincial limits.

Anything you can do to help us in this matter through

providing the Indian School with the necessary equipment which is not expensive would be much appreciated.

I may have occasion to be in Ottawa within a short time and if I do I shall try to make an appointment to see you.

Yours very truly,

E. K. Ford.
Inspector, Local Technical Schools &
Mechanic Science Departments.

Dear Sir:

I am extremely interested in the contents of your letter of the 8th instant and this Branch is quite willing to give Father Mackey and Sister Paul as much assistance as our finances will permit.

I note that the necessary equipment will not be expensive and I am writing to Father Mackey today to ascertain the exact expenditure involved.

We appreciate the interest that you are taking in this project and whenever you are in Ottawa I would be glad to have you call on me.

Yours truly,

Philip Phelan,
Chief, Training Division.

Dear Father Mackey:

I have a letter from Mr. E.K. Ford, Inspector of Technical Schools, Halifax, N.S., in connection with your pottery project.

I feel that it is very desirable to encourage this work and you will note that it is our intention to assist you financially in the purchase of the necessary equipment which Mr. Fort states is not expensive. Please let me know exactly what expenditure is involved and just how far the work has gone.

Yours truly,

Philip Phelan,
Chief, Training Division.

OTTAWA, Ontario.

DEPT. OF MINES & RESOURCES
JUN 2 1941
REGISTERED

Dear Mr. Phelan:

It is too bad so much delay has occured in getting to Father Mackey of the Shubenacadie Indian School the specifications and costs of a ceramic kiln and further too bad I missed you when you were here. The past few days I have had in the office and some definite information is now available.

We have the drawings, descriptions, and cost estimates of a kiln that can be built for $200. The price given me was $150 but I arbitrarily added $50. Single firings can be completed at about $2.00. From the specifications we have I am satisfied that the work can be done with local labour.

When the matter was first discussed I believed we could construct a small kiln suitable for school or small production purposes at a cost of $200 or $250 which would burn wood or coal. Subsequent careful investigation showed that the cost of underground flues, smoke stack, ironing for bracing and other factors would run the cost to several hundred dollars. Furthermore the successful use of such kilns, I learned, requires much skill and even experienced men have considerable losses on any new kiln. For such reasons the small outside wood-fired kiln was given up even though it at first looked promising in view of our estimated future needs in various localities in the province.

The specifications we have provide for an electrically heated kiln, inside measurements, 18 inches approximately by two feet; lined with light , refractory (heat resistant)brick ; outside shell, steel plate, standing on ordinary hollow building tile for ventilation beneath; no stacks or flues necessary; and operated off either 110 or 220 volt circuit with no transformer necessary. Such a kiln can be set up in a building anywhere, is very easy to operate because the element of judgment as to heating is largely eliminated. The switches are thrown in and the kiln brought to heat checked by cones. The light, refractory brick use a .06 cone, I judge about 1800°F. The price on this job should not exceed $200 including the electric heating coils. One has been in use in New Brunswick for some time and the owner maintains he

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

can set them up for $100. I am a little skeptical of this estimate. Single firing prices are given at $1.50 where electricity costs 2½ cents per k.w.h. I think it is more in Shubenacadie so I allowed $2.00 which is probably below the operating costs of either wood or oil due to economy of burning.

As you know the Technical Education Branch has taken the first step in our appropriate field - that of training workers. The training project has grown from a class of 15 at Mahone Bay in 1937 to three classes enrolling 50 at Antigonish this summer and we had to turn one class away. We are getting results with children and adult groups in several places in the province. Definitely the market is here, - we have indisputable evidence of that. The next step is satisfactory, low cost baking equipment. The Provincial Department of Industry is interested and will help.

If your Department can co-operate by going ahead at the Indian School I shall be only too glad to work with Father Mackey in his attempts to solve the problems incidental to equipment. I feel sure we can get technical advice on electrical problems from the Technical College staff. The summer months of July and August are the period to do this. At this time also I could spend the needed time to co-ordinate the efforts of those in a position to bring the project through.

I am taking the liberty of sending Father Mackey a copy of this letter for his information.

Yours very truly,

E. K. Ford.
Inspector of ~~Evening~~ Technical Schools
& Mechanic Science Departments.

Copy sent to Father Mackey

Ottawa,
June 30, 1941.

Dear Mr. Ford:

I was extremely interested in your letter of the 23rd instant with reference to the specifications and cost of a ceramic kiln to be used at the Shubenacadie Indian Residential School. I had a short visit at Shubenacadie during Easter week and certainly consider that this work should be encouraged. I note from your letter that you consider the total cost of installing the kiln, including the electric heating coils, will not exceed $200.00. This Branch is prepared to provide this amount and payment will be made on receipt of the usual voucher signed by the Principal of the Shubenacadie School, Rev. Father Mackey. A copy of this letter is being forwarded to him.

We appreciate the splendid co-operation which you are giving us in this regard and I trust that the future work will be productive of good results.

Yours truly,

Philip Phelan,
Chief, Training Division.

No. 51 - 0 - 11

Dear Sir:-

In reply to your letter concerning the kiln:- After receiving the copy of your letter to Mr. Ford, we began trying to get details of construction and materials needed.

Mr. Ford, and we, ourselves, were of the opinion that a kiln could be built suitable for our purposes, which could be fired by wood or coal. Mr. Shaw, President and Owner of the N.S. Clay Works promised to give us all the help he could. We interviewed Mr. Shaw about it at least on two occasions, and we did not seem to be getting anywhere. Finally, Mr. Ford, knowing that this work was done in St. John and near St. John, decided that in order to get a real line on things, the best thing to do was to go to St. John. He went in his car, and took Mr. McLeod, our carpenter-engineer with him. Our expenses in the trip was the hotel bill for Mr. McLeod.

As a result of this trip Mr. McLeod obtained information as to where the high test brick could be obtained, and the construction of the kiln itself. But instead of being fired by coal or wood, the heating would be done by electricity. Mr. McLeod has since constructed a kiln, so Mr. Ford says, much better than any they saw on the trip to St. John.

As for high test brick and asbestos slabs, a firm, Prescott & Company, of Montreal, was recommended. We made up the specifications and asked them to supply the material. First they wanted to know if they could send the material C.O.D. Our reply was that the Department of Indian Affairs would pay for it, or if they were not satisfied with that, let us know the amount due and we would send the money before they made the shipment. Finally when they did ship it they wanted to know if they could send a sight draft to the Department. We sent them a check immediately

immediately for One Hundred and [illegible]-six Dollars and Eighty-eight cents.

We needed steel plate for the outside, and of course, we could not buy it new, so we hunted around and located an old tender of an engine and got our plates there. We also bought second hand fire brick. There was difficulty getting new fire brick, and the cost had gone up considerably.

Well, we had enough material to start the construction of the kiln. So ahead Mr. McLeod went. Next we were held up for the electrical wire and terminals. Mr. Ford, along with Professor Nicol, electrical engineer, spent a good part of last Friday, January 2nd, here, looking over the kiln, and working out the details for the heating. Again we find ourselves up against a brick wall trying to purchase the ribbon wire, etc. However, a telephone call since Mr. Ford went back to Halifax, informs us that Mr. Saxton, the Principal of the N.S. Tech. College, will order the wire etc., for the College, and turn it over to us. They have priority which allows them to do this. So, that is as far as we are now, we hope by the end of the month to have the kiln in operation. The cost so far for all, amounts to $189.47.

As for the pottery itself, we must have at least two hundred pieces ready to be fired. For that we have four classes a week, including boys and girls. The teacher, Sister Paul of the Cross, completed her three years of summer school at the work, and now holds a first class certificate. We might also add that her father has supplied her with money to purchase many odds and ends needed in the work.

We don't think we have forgotten anything, and hope this will be satisfactory.

By the way, we have paid for everything so far, also travelling expenses for vacations, and Sixty Dollars for teeth, but with increases everywhere, we are finished with that sort of things from now on.

Yours very truly,

Rev. J. P. Mackey

Dear Sir:-

Enclosed please find accounts which have been paid from school funds in connection with the building of the kiln for pottery work.

We were given permission to spend, if necessary, Two Hundred Dollars on this project, but we cannot locate the letter specifying that amount. However, your letter of March 13th, 1941, and December 31st, 1941, indicate that we have your approval.

We might say that we are sending in these accounts before the kiln is completed. We are still being held up on account of the electric ribbon wire. We have been promised this through the good offices of the N.S. Technical College of Halifax. The cost, they told us, would be in the vicinity of Thirty Dollars.

However, we are afraid that we will not be able to complete this kiln before the close of this month, and are, therefore, sending in these accounts which cover to a great extent the expenses incurred.

Yours very truly,

Rev J. P. Mackey

ACTING DEPARTMENTAL PURCHASING AGENT

I attach account covering the cost of securing a pottery kiln for the Shubenacadie Indian Residential School. The clay in the vicinity of the Shubenacadie School was found to be very suitable for the making of pottery and the Rev. Principal decided to encourage the pupils to make it. One of the Rev. Sisters on the staff is capable of teaching the work. However, to handle this work properly a kiln had to be provided and this could only be secured from Prescott & Company, Montreal. The making of pottery has proved very popular with the pupils of this school and I feel it is a vocational activity and should be encouraged. I, therefore, recommend that a purchase order be issued in order that the account may be paid. The coding is as follows: 265-76-13-491.

Dear Father Mackey:

I have today discussed with Miss Moodie the subject matter of your recent letter relating to the organization of the pottery project at your school.

As you might suppose, we have experienced difficulty in securing a potter's wheel. Miss Moodie, however, is of the opinion that there is a man in New Brunswick who would be prepared to make one of these wheels for you. I have asked Miss Moodie to communicate with you and to supply you with all the information she has at her disposal in respect to this man. It is my hope that this letter from Miss Moodie will reach you in the course of a few days. In the meantime, may I thank you very heartily for your letter and for the information contained therein. It is my earnest hope that the pottery project will prove successful and profitable in every sense.

Yours sincerely,

R. A. Hoey,
Supt. of Welfare & Training.

AUG 13 1943
RECEIVED

Mr. R. A. Hoey,
Supt. of Welfare and Training,
Department of Mines & Resources,
Indian Affairs Branch,
Ottawa

Dear Mr. Hoey:-

We are very glad that you are pleased with the samples of pottery, which Mr. Rice so kindly brought to Ottawa.

The start was made about three years ago, when the Provincial Department of Education, established a summer school, in order to develop teachers for pottery. The Sisters of Charity were invited to send representatives to this summer school, and Sister Paul of the Cross, of the staff here, was one of the chosen ones.

Under the impetus given by Mr. Ford, of the N.S. Technical College, we began some work, and also began exploratory work about a kiln. At that time we thought that a kiln could be built in which coal and wood would be used as fuel. We spent a lot of time on it, but got no where. By this time, Sister Paul of the Cross had completed two courses, at summer school. In the meantime, we had collected a number of pieces of pottery, and still, had no way of firing or baking them. Mr. Ford then wrote to the Department of Indian Affairs, and we obtained the sum of Two Hundred Dollars towards the building of a kiln. All thought of wood or coal as fuel was abandoned, and it was decided to go ahead with an electric kiln. They have electric kilns in New Brunswick, so Mr. McLeod, our carpenter-engineer, was sent there to look them over. With further assistance from the N.S. Technical College, we got the blue prints, and Mr. McLeod went ahead, and built the kiln, which, from all accounts, was quite an improvement on what he had seen in New Brunswick. We were held up for a long time before we succeeded in getting any heating wire. Finally, we did get it - the first of this year. We were given details by an electrical engineer from the Technical College, and to an amateur, it looked quite complicated. However, anyone who knew anything about electricity was contacted, even to passengers in the smoking compartment on trains, concerning volts, killowatts, amps, load, and many other things. Finally, we interested a man by the name of Smith, from Stewiacke, the next village, and while holding no degrees from any college, has a very definite talent for things electrical.

Indian Affairs. (RG 10, Volume 6058, file 265-11, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

We [illegible]ged the kiln according to the specifications of the electrical engineer, and it was not satisfactory, and so Smith told us what he would do. We contacted the electrical engineer, and he gave us all sorts of warnings, what would happen, if we used heavy wiring, and increased the amperage. It was no good as it was, and we spent plenty of money on it, so we spent another Fifty Dollars, for wire, fuse boxes, etc., and decided that soon we would know whether we had something or nothing. We have had ten or eleven firings, and everything has gone very satisfactorily. Now they want us to do bakings for other sections.

We have had a visit from representatives of the U.S. Dept. of Industry, and the supervisor for handicraft seemed more than surprised to learn that the clay for our work is found on the side of a ditch about a hundred yards from the school.

Our problem now is to find a glaze that will take well on both the red and white clay. Miss Black, the supervisor of handicrafts for the Province is going to take a ten pound sample to a Danish family in New Brunswick, who have been making pottery for generations, and also making their own glazes. The peculiar thing about it is that they import their clay fro[illegible] Musquodoboit, in Nova Scotia.

When Mr. Doucet was here, we were hoping that we might obtain a potters wheel. The one we have was put together by Mr. McLeod, from a defunct potato peeler, cover from the top of a stove, part of a sewing machine, and the motor from a discarded household washing machine. Of course it has only the one speed, and does not run exactly true. In our last requisition for school supplies, we asked for one, and while most of the supplies arrived, we have not heard anything about the potters wheel.

It is our intention to produce for sale, and if the time ever comes again, to cater to the tourist trade. The kiln is 21" wide, 24" deep, and 27" high, rather larger than we expected to build. We have had as many as sixty-two pieces fired at one time, and as low as fifty-two, depending of course, on the size.

At the present time, we have four classes, 1 for boys, and three for girls, and some are exceptionally good at it. By the time the younger ones are old enough to be discharged, they should be quite proficient in it. It is our intention to concentrate as much as possible on Indian designs. We hope to get some valuable information along that line from the Fort Anne Museum at Annapolis Royal. On the other hand, Mr. Ford told us the other day that if we would make for him one hundred bean crocks, he would sell them between here and Halifax.

Indian Affairs. (RG 10, Volume 6058, file 265-11, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

We have no separate meter for the kiln, but since no other power is used when it is going, and also that our power charges have been quite uniform for years, we figure that a firing up to 1800 degrees, costs between three and four dollars. We have been offered all the clay we want from a former brick yard plant, and from Mr. Lawlor, a former Indian Agent. We feel quite sure that we can get a first class fire clay that will bake out white. Clay from anywhere near here is quite satisfactory. At the present time, we have already fired and ready for glazing about three hundred pieces. We shall go ahead and try different clays, and in that way, have as much variety as possible. As soon as we are ready, Lawlor's store has offered to make a window display for us. We expect to have about a hundred pieces on display there by the end of this week.

We hope to purchase a stamp, about the size of a five cent piece, and have an Indian head in the center, and M I C M A C around the edge, and use that to indicate the Indian origin.

They have pottery as one of the subjects at Mt. St. Bernard, affiliated with St. Francis Xavier University at Antigonish. There they have an oil burner kiln, but from what we have heard, it is not too satisfactory, and requires a lot of attention.

We have used to a limited extent some of the diagrams on the cards you sent. If you think it would be worth while, we would be glad to send to the Department a number of pieces for sale, say from fifty to seventy-five.

We would be grateful if Miss Goodie would send us samples of glaze, especially red color.

Hope we have not overtaxed your patience with this lengthy epistle.

Yours very truly,

E. P. Mackey

Dear Father Mackey:

On my return from duty on reserves, Mr. Hoey handed me your letter of May 17 regarding your pottery project at Shubenacadie, and he suggest that I should write you in this connection.

Your letter is most interesting, and I can well imagine some of your difficulties. It is wonderful, however, to have such good clay available, and to have found out already how to handle a kiln. Have you considered producing more primitive unglazed articles? There is ready sale for such goods, although they have to be very carefully packed, and they are used for things not required to hold liquids. They would not be suitable for pitchers, for instance, but I have seen candle holders, match holders, ash trays, etc., simply baked, and sold in the natural color---I believe potters call these baked, unglased articles, "biscuits".

As for design---the less ornamentation there is, the better the article seems to sell, except that at present there is a vogue for "slip-painting" before baking. The potter makes a thin paste of clay, which is colored by artificial means if necessary, and "slip-paints" a simple design which may be just irregular lines or daubs. If the article is light in color, they use dark-colored clay. If it is dark in color, they use light-colored clay, and the variations are endless. The simpler the design the better.

Kjeld and Erica Deichman, of Moss Glen, N.B., are about the best potters in Canada. Besides having wonderful artistic sense, they are very practical---and these may be the people Miss Black, the N.S. Supervisor, referred to. If you could get Mr. and Mrs. Deichman to spend a week or two at your school, I believe any expenditure involved would be well worth while. They are not mercenary, and are sincerely interested in promoting the production of good pottery. Mr. Deichman makes their own potter's wheels---he used an old car axle, sewing machine treadle, etc. (something as you did), but he is sufficiently experienced to

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

to have been able to get his wheels to run true, and he governs the speed by foot-pedal. He makes the larger articles---vases, jars, bowls, etc., on the wheel, and his wife is particularly skilled in modeling by hand-method, charming little animal figures---colts, lambs (and sometimes humans). She uses an old gramophone to provide her with a wheel. These two have experimented and found wonderful glazes, and here again, I can recommend no better source of information than Mr. Deichman.

If you could produce even one or two small articles in quantity, I would love to include them in our catalogue and price-list of handicraft merchandise---but our orders come to us requiring quantities of from one to 12 gross of a line. The only times I can sell small lots of goods are when we put on exhibitions, and these are out for the duration. We could certainly use ash trays, small bowls to hold matches, candle holders, etc., in the unglazed "biscuit"---but we would need to have samples of two or three very plain, simple designs of each, and then decide on one of each, and definitely try to produce in quantity. It would be a wonderful thing to have a pottery centre in the village, where your graduates could earn their living after leaving school. Certainly there is great opportunity for the sale of pottery, but it will require great care in figuring the prices per dozen articles to be paid to the workers, and the prices to be charged the wholesalers. With our basketry sales we have our list price---and the selling agency is given a discount of 30 per cent to cover costs of selling and collecting accounts. In addition, we add from 5 to 10 per cent to cover transportation costs from reserves, packing, cartons, etc.,--so the wholesale price has to be considerably higher than the price paid to the workers.

I have always hoped to get back to Shubenacadie since my one short visit there when the school was barely completed. Now that I know of this pottery achievement I am twice as anxious! I do hope you will find it possible to engage the Deichmans for at least a short period, and that they will be able to iron out some of the difficulties you have encountered.

Yours sincerely,

In Charge

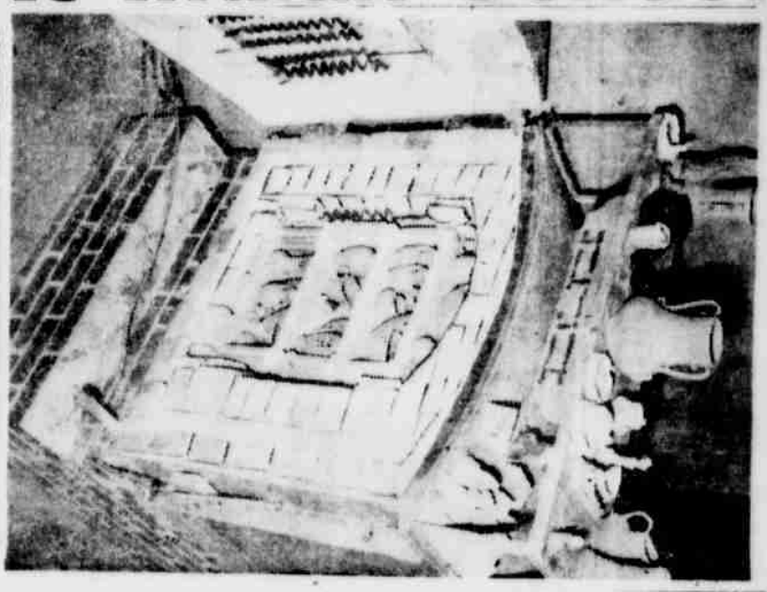
Ancient Indian Art Is Revived At Indian School



ELECTRIC KILN IN WHICH POTTERY WARE IS BAKED—The kiln was made by E. B. MacLeod, manual training teacher, and is the only one in the province.

By JEAN COURTNEY

Their nimble fingers plying eagerly at an age-old art, followed in the days when their forefathers were roaming the uncivilized Canadian wilds, children at the Indian Residential School at Shubenacadie are turning out objects of art that would grace any modern home.

"Making mud pies", an enjoyable though rather messy childish recreation, has taken a constructive form here and the vases, ashtrays, book-ends, model animals and scores of similar articles on display at the school testify to the talent of the young pupils.

But pottery is not the sole accomplishment of these boys and girls. The girls are taught laundry work and sewing and the boys become proficient in their tasks on the school farm. The modern brick school was built in 1929.

The pottery project, begun three years ago, by Rev. J. B. Mackey, Principal at that time, has become an integral part of the educational program of the Indian children from the three Maritime Provinces who live at the school.

The institution, established in 1929 is conducted by the Sisters of Charity under the principalship of Rev. J. W. Brown, and houses 150 young boys and girls of Indian parentage until they reach Grade 8. Sister Eleanor Marie is Superior. The curriculum is standard for Nova Scotia schools, but from Grade 3 up the students are required to devote a half-day a week to learning to make pottery. The boys and girls apparently possess a natural aptitude for such work and the finished articles show a symmetry and beauty of design which would do credit to far older and more highly skilled workers.

Children in the more advanced classes have been given permission to come to the pottery room after school hours and work on articles they have begun during class. Many become so fascinated with shaping the strips of clay into vases, bowls or any one of a score of things, that they readily forfeit recreation periods in order to have more time for their pottery.

The boys began to learn the art only two years ago but have made rapid progress.

Sister Paul of the Cross, who instructs the children says her classes turn out about 50 finished articles a month.

A particularly good type of clay may be secured in the school's back yard. The children dig it up and bring it to the pottery room where it is sifted to rid it of impurities then moistened and dried to the required stage of pliability. It must then be cut in strips before work can be started. Vases, bowls and similar articles are made by hand with the aid of a templet (a metal instrument which helps to shape the clay), animals ashtrays, etc. are formed on moulds.

The electric kiln, only one of its kind in Nova Scotia, was installed last May.

The kiln measures 24 x 24 x 26 and was constructed by E. B. MacLeod who teaches the boys manual training and who has charge of all electrical appliances in the school. Fifty articles of "biscuit ware" can be baked in the kiln and between 60 and 75 of "glazed ware".

No effort has been made to sell the pottery ware, but visitors to the school, intrigued by the sharp contrast between the unworked clay and the sweeping, graceful lines of the completed urns and vases, admire the products greatly and often purchase them.

Work on a piece of pottery is not completed when the article is finished as to form and design. It must then be dried for a period which may last as long as two weeks, depending on the size of the article. It is then sandpapered and baked. The first baking is called the biscuit firing and results in a finish similar to that of a flower pot. After applying glaze with a brush, or by spraying or dipping, the pottery is baked again—this time for seven or eight hours at a temperature of 1800 degrees.

Objects may be colored by adding various oxides to the glaze. School authorities say the pottery project is just beginning and that great things may be expected if it can be raised to the status of an industry.

Ottawa, January 15th, 1945

Dear Reverend Sister:

When Mr. Arneil returned from Shubenacadie he had with him the correspondence regarding the Amaco Electric Potter's Wheel, which is available from the Denver Fire Clay Company. There appears to be a little difficulty in securing the necessary priority, and as I was leaving for Toronto about the time Mr. Arneil returned to Ottawa, I suggested that I might be able to locate a wheel in that city.

There is one available which is being held for us pending receipt of your approval. It is not operated by electricity but by a foot pedal, and I used one exactly like it in the pottery room of the Women's Art Association of Canada. The only criticism I would make is that the pedal is for the left foot only, and I prefer the kind with a pedal straight across the frame so that either foot can be used. I think this could easily be changed, as the pedal can be lengthened in the manual training class. The height of this wheel from the floor to the top of the turntable is about four feet. The box in which the wheel sits is approximately two and a half feet square and the wheel is very easy to operate. The price of this wheel is $76.50 F.O.B. Toronto, and if you do not think it will be suitable I think I will order it for another Reserve where clay is available for pottery purposes.

I have been very anxious to visit Shubenacadie again -- my only visit was at the time the school was being opened and of course there were no interesting projects such as yours started at that time. I have

Miss Kathleen Moodie

Dear Miss Moodie

In reply to your letter of Jan. 15th I appreciate your interest in the purchasing of a Pattie wheels for the school. I would prefer waiting until an electric one is available It would be more serviceable. The one you suggest would be impossible for smaller children to use. There are some small children who will be using it. My Pattery classes range from the third to the eighth grades ~~In~~ which there are many small children

Thanking you once again for your interest and assuring you of a cordial welcome to our classes.

Sincerely
Sister Paul the Cross.

Ottawa, February 15th, 1945

Dear Reverend Sister:

There has been a little delay in replying to your letter regarding the potter's wheel, but you will be glad to know that we are making a further effort to secure the Amaco Electric Potter's Wheel. We have suggested to the Chief Purchasing Agent that he should make a strong effort to secure the wheel for this department, and that the account could be paid here and the funds collected later from you. I presume that with tax the wheel will cost in the neighbourhood of $250.00 and that there will be an additional charge for payment in American funds of from $25.00 to $30.00.

We cannot be sure that this will go through, and if it does not I am afraid we will have to wait until peace is declared.

The Chief Purchasing Agent has been requested to return your letter from The Denver Fire Clay Company together with the catalogue cuttings.

With best wishes.

Yours very truly,

KM

Memorandum:

CHIEF PURCHASING AGENT

During the past few years the pupils in the Shubenacadie Indian Residential School have been given instruction in pottery making. There is a deposit of unusually fine clay on the school property, and the school has installed an electric kiln for firing the articles produced. Through local sales of these articles the Sister in charge of the pottery group informed Inspector Arneil that they have sufficient funds to purchase an electric potter's wheel, but in order to secure the one they desire they have been informed by the Denver Fire Clay Company that "a priority of AA-3 or better" is required. Apparently the Sister did not know how to go about securing any priority and when Inspector Arneil visited Shubenacadie she requested our assistance.

I enclose the letter from the Denver Fire Clay Company, together with cuttings from some catalogue which Sister Paul of the Cross gave to Inspector Arneil. The wheel which they decided upon is the Amaco Electric Potter's Wheel No.2 -- $198.00 plus tax which I believe brings the cost to approximately $250.00. This does not take into consideration the fact that payment should be made in American funds.

I will appreciate it very much if you could arrange to secure the wheel in question -- to be shipped to:

The Principal,
Indian Residential School,
Shubenacadie, N.S.,
Canada.

The account could be paid through this office and collected from the school.

I feel that the work done under the direction of Sister Paul of the Cross is very creditable and I am anxious to do everything possible to assist her in promoting this work. I might mention that we communicated with the Sister and suggested a foot power wheel which could be secured at a lower cost. She has replied, however, that they prefer the electric wheel as the foot power wheels are too high to be used by smaller children.

Sister Paul of the Cross has requested that the letter from The Denver Fire Clay Company and the catalogue cuttings attached should be returned to her.

Recd. on file

51-1-11

Ottawa, February 22, 1945

Dear Father Brown:

When Inspector Arneil visited Shubenacadie he was very much impressed by the progress which had been made in the production of pottery under the direction of Reverend Sister Paul of the Cross. At that time the Reverend Sister gave to Inspector Arneil some correspondence from The Denver Fire Clay Company, together with a catalogue cutting showing the type of electric wheel which the Sister had been trying to secure. It was understood that if at all possible we were to secure a Government priority and place an order for an Amaco Electric Potter's Wheel, Number 2, Floor Model, (list price $198.00).

We have been able to have this order placed and the total estimated cost, which includes exchange on the purchase of American funds, war tax, excise, etc., is $317.00.

We have been advised by the Chief Purchasing Agent that the wheel will probably be shipped to the Port of Entry nearest Shubenacadie (possibly Truro), and that it will be necessary for someone to go from Shubenacadie in order to clear the wheel through the Customs. The wheel will be released from the Customs after you have paid the account for duty and excise, which will amount to approximately $60.00.

As the order has been placed through the Department of Mines and Resources, payment for the wheel itself must be made by cheque from this Department. As we are nearing the end of the fiscal year our funds for the purchase of equipment have been exhausted, and it is necessary, therefore, to ask you to mail to me your cheque for $250.00, payable to Receiver General of Canada, and including on the face of the cheque the identifying word "Shubenacadie". It is possible that after the account is paid in American funds there will be some small balance which of course will be returned to you.

I have no doubt that you are conversant with the arrangements between Inspector Arneil and Reverend Sister Paul of the Cross, and I may say we are pleased to have been able to be of assistance in this matter.

Yours very truly,

Philip Phelan,
Chief, Training Division

DFC Register No. 18180

Attention: Sister Paul of the Cross.

Gentlemen:

We appreciate and thank you for the above order which we have just received. Our formal acknowledgement is enclosed showing our understanding of it and, if not correct in every way, please advise us.

Shipment will be made as promptly as possible. If it is unduly delayed, we will inform you later in detail.

In accordance with your letter of March 20th, we plan to furnish a DFC type B Potter's Wheel instead of the Amaco Model specified on this purchase order. This will be invoiced at $159.00 f.o.b. Denver.

Yours very truly,

THE DENVER FIRE CLAY COMPANY

Ottawa, April 19, 1945.

Dear Father Brown:

I attach copy of purchase order No. 1097 and I am also in receipt of a letter from the Denver Fire Clay Company which reads in part as follows:-

"Re Order 1097, in accordance with your letter of March 20th, we plan to furnish a DFC type B Potter's Wheel instead of the Amaco Model specified on this purchase order. This will be invoiced at $159.00 f.o.b. Denver."

In connection with this purchase I would refer you to my letter of February 22, 1945, and particularly to paragraph 4, in which you were advised that as the order had been placed through this Department, payment for the equipment must be made by cheque from this Department. As there is some doubt regarding the exact cost of this machine, it will not be necessary for you to forward your cheque immediately. However, as soon as the machine reaches you, the firm will no doubt send you their account, and at that time you should forward the account to this office, together with a school cheque covering the cost of the machine. We will deposit this cheque and issue a government cheque to the firm. As previously mentioned, the cheque should read "Payable to Receiver General of Canada".

Yours sincerely,

Philip Phelan,
Chief, Training Division.

Subject: Order No 1097
DFC Reg. 18180

The Electric Potter's Wheel on above order number was shipped from Denver by prepaid CB&Q freight on August 1st, and following instructions from the Department of Mines & Resources, we are sending you the papers mentioned below pertaining to this shipment:

4 Commercial invoices
3 Canadian Customs invoices
Original bill of lading

It is impossible to add the prepaid transportation charges and send the receipted freight bill on the bill for the goods, but we will send you this information just as quickly as we can. The freight will follow charged on Reg. D04266.

We appreciate your patronage, and trust this shipment reaches you without further delay.

Dear Father Brown:

I am in receipt of letter dated 2nd instant from Denver Fire Clay Company in which they state that the Electric Potter's Wheel was shipped to your School on 1st August.

In connection with this equipment I would refer you to my letter of February 22nd and April 19th, 1945. When the wheel arrives, you should forward cheque as mentioned in the letter of April 19th.

Yours very truly,

Dear Father Brown:

I desire to refer you to my letters of February 22, 1945, April 19, 1945, and August 9, 1945, with reference to the Electric Potter's Wheel which was purchased from the Denver Fire Clay Company.

We requested you to forward the account, together with a cheque from school funds, to this Branch, so that we could issue government cheque in payment. We have not received either your cheque or the account and consequently we are at a loss to know whether the wheel was delivered. If so, did you pay for it direct from school funds? Please let me have an early reply.

Yours sincerely,

Philip Phelan,
Chief, Training Division.

Dear Sir:-

The Denver Fire Clay Company of Denver, Colorado, wrote to us with a view of securing payment for an account of $159.00 and upon which there was a transportation fee of $6.68

As we were unable to check up on this outstanding account we wrote them for invoices and they have accordingly arrived and we find that the invoices should have been sent to you instead of to the Department of Mines & Resources, Ottawa. Canada. We are therefore, taking the liberty of forwarding these invoices, and I take it that the Denver Fire Clay Company will be glad to have the account paid for in the near future.

Yours very truly,

SIGNED M.M. FARNHAM

Dept. of Mines & Resources,
Ottawa

Dear Mr. Phelan: File 51 -0 11

In reply to your letter of February 18th, regarding the Electric Potter's Wheel, we are sorry about the misunderstanding concerning this matter.

We received the wheel, some months after the order was placed, and paid the Customs. No bill came here, and we were waiting word from the Denver Fire Clay Company. In the meantime, we received a letter from the Secretary, M.M. Farnham, Bureau of Mines, copy of which we are enclosing.

On January 11th, we paid this bill, through the Royal Bank at Shubenacadie, from funds acquired from the sale of Pottery at the school.

We hope that this will explain matter satisfactorily.

Yours very truly,

J.M. Brown

1097

Re: Purchase Order No.1907

In setting up the above order in favour of the Denver Fire Clay Company, we estimated the total cost, including duty and all other charges, at $317.00. However, the Principal of the school will be arranging to clear the Potter's Wheel from Customs and will therefore be paying the duty.

Under the circumstances, I would suggest that you reduce the amount of the encumbrance by approximately $67.00, so that the total amount to be encumbered would not exceed $250.00.

Reverend J.W. Brown, Principal, Shubenacadie
Indian Residential School, Shubenacadie, N.S.

Attention Sister Mary Charles.

In reply to your request of some time ago, I wish to remark that this is the first request we have received for badges for your school.

From the circulars we have sent, you are probably aware that there are four sets of badges. The first year which is green, the second which is red and the third year which is scarlet. The fourth is a graduation brooch which is a silver pin. I have, no doubt, that these children have covered the work required and qualified for the silver brooch. However, I am enclosing special cards which you will kindly complete and return to this office at your earliest convenience. This matter, then will be dealt with fully and I hope that we will be able to award these to the pupils recommended.

Enclosed also find a circular re the awarding of brooches.

I wish to bring to your attention the second paragraph of your letter which asks for four scarlet brooches. I presume that you mean the third year proficiency badge for these subjects. The enclosed circular will explain to you that a child requires three years in each one of the subjects covering the proficiency operation as outlined in the coloured sheets, before he can qualify for a brooch.

Encl:
AJD/HM.

A.J. Doucet,
Supervisor, Vocational Training.

Requisition No.

Order No.

To The Departmental Purchasing Agent, Ottawa,

Please furnish the following Supplies for use of Shubenacadie Residential School

Vote Primary Object Date Required

Ship to Rt.Rev. J.P. Mackey, Principal, Shubenacadie Indian Residential School, Shubenacadie, Nova Scotia.

Mail Invoices to Mr. H.C. Rice, Superintendent, Indian Agency, Micmac, Hants Co. Nova Scotia.

Purpose for which required School #265

Quantity		Unit Price	TOTAL
100	ft. of heating wire.		
	NOTE: The heating wire in the kiln used for pottery at the Shubenacadie School has burned out and has to be replaced. The wire must stand a temperature of 2200 degrees, and the school uses 220 volts of electricity. The Principal has tried to obtain this wire from the Canadian General Electric in Halifax, but he was told that this firm did not stock it, and they suggested the wire be purchased from Walker Metal Products, Walkerville, Ontario. A sample of the wire required is attached to this requisition.		
	P.O. 44508 21/6/49		

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

SIGNED— APPROVED—

Ottawa, Ontario.

Dear Sir,

The heating wire in the kiln used for the pottery is burned out. This wire was installed either late in 1941 or early in 1942. We obtained it at the time through the Shipyards in Halifax as we had no priority to purchase such material.

We tried the Canadian General Electric in Halifax yesterday and were told that they did not stock it but they gave us the address of Walker Metal Products of Walkerville, Ontario.

The wire must stand a temperature of 2200 degrees, and we use for the most part 220 volts. The enclosed is a sample and the amount required is one hundred (100) feet.

Will the department supply this item? In any case will you obtain the price and order one hundred feet as the pottery is at a standstill now, and this heating wire is absolutely necessary.

Very truly yours,

J. P. Mackey.

WALKER METAL PRODUCTS
Walkerville, Ontario

May 20, 1949

Department of Mines & Resources,
Ottawa, Ontario.

Attention - Mr. W.M. Vincent,
Departmental Purchasing Agent.

Gentlemen:

We wish to thank you for your Request for Quotation of May 17th.

We have thoroughly checked the sample over and find it to be 1/2 x .030 Chromel A ribbon. Ordinarily we do not recommend the use of Chromel A material above 2000 degrees. However, in pottery kilns, where the temperature climb is fairly slow, you may be able to have satisfactory life at a slightly higher temperature, but 2200 degrees is too high in the writer's opinion. However, if you have this material operating satisfactorily at present, there is no reason why you should not continue to use same.

Yours very truly,

WALKER METAL PRODUCTS LIMITED,

(Sgd) P.E.Banwell

Engineer.

A.M.
REGISTERED

Col. B. F. Neary, Esq.,
Supt. of Education,
Indian Affairs Branch,
Dept. of Mines & Resources,
OTTAWA, Ont., Canada.

In view of the fact that a Manual Training Instructor has been hired to teach at the Indian Day School, Micmac, N. S. and at the Indian Residential School, Shubenacadie, N. S., the matter of housing accomodation has been discussed with Mr. Doucet of your office.

There does not appear to be any vacancy in the village of Shubenacadie or in the immediate area which Mr. Brown and his family could rent during the current academic year.

It would appear if Mr. Brown was to obtain a dwelling on the Indian reserve, Micmac, N. S. that his usefullness to this agency will be greatly increased.

Mr. Doucet has suggested the possibility of a residence for this teacher being built on the Indian reserve. It would appear that due to the housing situation in this locality, that this might be the only solution.

May we have your comments, please.

H. C. RICE, Superintendent,
Shubenacadie Indian Agency.

Mr. H.C. Rice
Superintendent, Indian Agency,
Micmac, Hants Co., N.S.

We have your letter of May 30th with reference to a residence for the manual training inspector at the Shubenacadie Schools.

The Department desires you to continue your efforts to rent a building in the Village of Shubenacadie or in the immediate vicinity that might be suitable. If you can obtain such, you should wire us immediately.

No funds were provided in the current year's appropriation for the erection of a residence for him.

Ottawa, Ontario.

ATTENTION OF MR. PHELAN

Dear Sir,

In reply to your letter of May 27, and the memorandum from Walker Metal Products Ltd., of Walkerville, Ontario, I wish to inform you that at no time does the kiln go over 1800 degrees, and we only want to make sure that we have at least two hundred degrees (200) of safety in order to insure long life.

The last wire 1/2 X .030 Chromel A ribbon lasted well over five years at least, and proved very satisfactory. If this wire or a wire of even higher degree is available it would be most satisfactory to us.

~~Is the car yet on the production line?~~

Very truly yours,

J.P. Mackey

Memorandum:

SUPERINTENDENT OF INDIAN EDUCATION

Re: Schubenacadie Indian Residential School.

The Schubenacadie Residential School has an enrolment of 158 children. The junior division have 68 children in the classroom; the intermediate 35 and the senior 55. It will be necessary to operate a fourth classroom. There is space available. A room originally intended for a classroom is being used as storage and for the pottery. This room which is identical to one of the classrooms would be, after a general clean-up, very suitable. I would suggest that the principal submit estimates for the preparation of this room.

There is no workshop and no space available for one. It will be necessary to build a separate building that would serve as a workshop, (general shop and pottery) and also provide storage space. The principal should obtain estimates for a building that would supply his needs.

Respectfully submitted,

A. J. Doucet,
Supervisor, Vocational Education.

E 03

Indian Residential School,
Shubenacadie, Nova Scotia,
July 3rd, 1949.

Mr. Philip Phelan,
Chief, Education Division,
Indian Affairs Branch,
Department of Mines and Resources,
Ottawa, Ontario.

Dear Mr. Phelan:

The room reported on by Mr. Doucet is not exactly a store room. It is the room opposite Grade 1, and has been used as a workshop and also a place for making pottery.

To make a classroom would require plastering around most of the windows, sanding of the floor, and two coats of paint on walls and ceiling. These with other little things would cost from $150.00 to $200.00. In addition there would be black-board 40-50 feet and twenty movable desks-10 small and 10 medium.

Since the room with the kiln is next to the garage, we could have the garage as the shop for the pottery class. The garage for the car (If it comes) could be attached to the workshop and manual training.

We do not know what Mr. Doucet has in mind but we think a building forty by thirty, outside measurement, giving two rooms twenty by thirty would do for manual training and workshop.

We at the school could do a good part of work. With the help of two carpenters, a building not furnished on the inside should not take longer than forty days to build. If the rooms were found to be too cold then something might be done to remedy the matter in another year.

We think we have taken everything into consideration and figure that at the most, renovation of classroom, garage and new building should not cost more than $4200.00.

, August 2, 1949.

Dear Msgr. Mackey:

I desire to refer to that portion of your letter of July 3rd in which you mention a proposed new Manual Training building.

Mr. Doucet will send a floor sketch of the proposed building to you within the next few days.

You should forward two requisitions for materials. One requisition should give the quantities and kind of materials that can be secured from the lumber on hand with Superintendent Rice. The second requisition should show the items which will have to be purchased elsewhere.

A copy of this letter is being sent to Superintendent Rice.

Yours sincerely,

Bernard F. Neary,
Supt. of Indian Education.

Re: Manual Training Building,
Indian Residential School,
Shubenacadie, N. S.

Further to previous correspondence and reference to your letter of August 2nd last respecting the captionally noted suoject.

It was understood that a floor sketch of the proposed building was to be forwarded within a few days. However, to date, same has not been received and it is most urgent that immediate steps be taken on the construction of this building.

It is also difficult to submit estimates on the actual cost of the materials required until such time as the plans are at hand. As previously stated, there are some materials which can be obtained through the Shubenacadie Indian Agency but considerable materials will have to be purchased locally and for these, competitive tenders should be called. You can appreciate the elapsed time this is going to take and it would be appreciated if immediate steps were taken to forward the proposed plans referred to in your letter of August 2, 1949.

P. Phalen,
Education Division,
Indian Affairs Branch,
Dept. of Mines and Resources,
Ottawa, Ont., Canada.

Dear Phil:-

I am keeping to schedule and arrived at Shubenacadie last night. I find conditions here at the Residential School much better than on my last visit. You will note that we included some five thousand dollars in the Supplementary Estimates for the erection of a Manual Training shop at the Residential School. I think we will have to go ahead with the building in the near future even though the money may not be available for another month.

Would you please have Mr. Doucet send at once to Monseigneur Mackey, the drawing and the bill of materials for the Manual Training shop he intends to have built here. Most of the lumber can be supplied from the mill on the reserve at $40.00 per M. The Manual Training teacher can help with the erection and the sooner the plans get here, the sooner they can begin to get the building covered in.

I will get them to
requisition for the manual training
teacher as apparently Mr Doucet
did not order them. Also a
couple of power tools
Ben

Further to previous correspondence respecting the captionally noted subject.

Rt. Rev. J. P. Mackey, Princial of the Indian Residential School, has requested that the sum of $2,500.00 be forwarded at your earliest convenience to be used in connection with the labour on the proposed Manual Training building, and incidential materials in connection with same.

Work on the foundation is already commenced, and it is hoped to have the walls and abutments poured during the early part of next week.

Mr. H.C.Rice,
Superintendent, Indian Agency
Micmac, Hants Co., N.S.

Re: Manual Training Shop,
Shubenacadie Residential School
Your File 51-6-265

With reference to your letter of the 24th ultimo, an amount of $5,000.00 for the erection of the above building has been provided in the Supplementary Estimates for the fiscal year 1949-50, and Msgr. Mackey is being forwarded an accountable advance of $2,500.00 for labour.

You should forward to the attention of the Departmental Purchasing Agent a requisition for the materials required.

Bernard E. Neary,
Supt. of Indian Education

Mr. H.C. Rice,
Superintendent, Indian Agency,
Micmac, Hants Co., N.S.

With reference to your requisition of October 25th for certain equipment for the manual training class at the Shubenacadie Indian Residential School, we have previously arranged to purchase the saw.

With reference to the last 3 items on the requisition, we are substituting a 1/2 H.P. Hoover ball-bearing grinder, which Mr. Doucet considers will meet the requirements.

OTTAWA, November 16, 1949.

MEMORANDUM

Superintendent of Indian Education

Receipt is acknowledged of your memorandum dated November 9, 1949, file 265-11 (E), regarding material required for the construction of a Manual Training Shop at the Shubenacadie Indian Residential School.

A copy of a letter going forward to Mr. H. C. Rice, Indian Superintendent at Shubenacadie, which is self explanatory, is attached.

H. M. Jones,
Superintendent of Welfare.

, November 16, 1949.

H. C. Rice, Esq.,
Superintendent, Indian Agency,
MicMac,
Hants County, N.S.

Your requisition dated November 3, 1949, listing building materials required for the Manual Training Building at Shubenacadie has been referred to the Welfare Division by the Superintendent of Indian Education with the comment that it is the latter's understanding that you can provide the material required from Welfare stock on hand.

This arrangement is satisfactory to the Welfare Division and as soon as the material is transferred you should submit a voucher in favour of the Receiver General of Canada for the credit of Welfare Appropriation 'Vote 515' covering the material so transferred.

The voucher covering the transfer of this material should be submitted in triplicate in accordance with the sample voucher attached. It should be submitted at your earliest convenience in order that your Welfare Appropriation may be reimbursed by the value of the material transferred.

H. M. Jones,
Superintendent of Welfare.

Mr. H.C. Rice,
Superintendent, Indian Agency,
Micmac, Hants Co., N.S.

Re: Your Voucher No. 1638

The Department finds it necessary to return your Voucher No. 1638. Official letter of September 10th authorized purchase of the items shown on the list which you forwarded under cover of your letter of August 24th.

The account attached to Voucher No. 1638 is for double the amount requested on the list which you sent. We also feel that several of the prices are high. I refer particularly to paint at $1.95 a quart.

When replying you should state why you apparently increased the amount. You should also replace the Voucher by two Vouchers, one covering supplies delivered to the manual training room at the Shubenacadie Day School, and the other for supplies for the manual training room at the Shubenacadie Residential School.

Philip Phelan,
Chief, Education Division

Re: Voucher 1638

With reference to your letter of December 6th re the above voucher. There seems to be some mistake with regards to the amount of this purchasing order. There was supposed to be double the amount of tools instead of one lot. Half for the Indian Day School and the other half for the Indian Residential School.

I also note that several of the prices are high on the paint. This is the current retail price that the paint Companies set themselves.

I trust this meets with your approval.

H. C. RICE, Superintendent,
Shubenacadie Indian Agency.

Re: Manual Training - Shubenacadie
Indian Residential School

We have received the following Vouchers covering the cost of materials purchased in connection with the above:

Voucher 1784	- Spencer Bros. & Turner, Ltd.	- $ 225.87
" 1838	- " " " "	- $ 36.60
" 1797	- Henry G. Pineo	- $ 114.20
" 1767	- E.F. Preiss	- $ 266.80

On none of the above Vouchers do you state the date and file number of the letter authorizing purchase, nor do you mention any Purchase Order.

In official letter of August 2nd addressed to Father Mackey and a copy of which was sent to you, you will note in the third paragraph that the Department stated that a requisition should be forwarded for the materials required. Our reason for this was that orders for materials must be placed with the Departmental Purchasing Agent. You acknowledged receipt of that particular letter in your communication of August 26th, but we cannot find on our file any requisition for the materials.

Please let us have your explanation of the matter by return mail.

Bernard F. Neary,
Supt. of Indian Education
